About me

I'm a Junior Graphic and web Designer with BA(Hons) Graphic Design degree from Buckinghamshire New University. I specialise in digital design as well as editorial design. As a creative, organised and professional individual I will always put everything i can into a project to get the results the client wants. I love working on a range of different topics/projects, and taking a project from an idea to a final piece while exploring different solutions and ways it could be done.

Experience

The Perfume shop

2021- Current day

The Perfume Shop is the UK's largest specialist fragrance retailer and I am one of their Junior digital designer. My role includes not only graphic design elements like designing banners for our site, advertisement material, as well as designing emails to get sent out to thousands of our customers. My role also includes coding webpages for our UK and ROI website as well as updating current pages using HTML, CSS and JavaScript. To update our site we use Hybris WCMS were my code gets uploaded and were I can update any campaign material.

SheCodes Basic

May 2022

SheCodes is an online company which helps females learn to code using HTML, CSS and JavaScript. I have completed their Basic course were i learnt HTML elements, attributes, CSS proterties, positioning, spacing and JavaScript variables, if/else statments, fucntions and l ogical operations. From this course and the knoledge i already had vfrom coding i can can make a fully responsite site with multiple pages.

Buckinghamshire New University

2020 - 2021

I worked at Buckinghamshire New University as a junior designer, working alongside the head of creative design. I helped the team re-brand the whole university. I helped to build the website mostly working on layout design, producing promotional materials like gift bags, design editorial pieces and large pieces of work to go on and around the university.

Read - Learn - Relax Subscription box

2020

For my final major protect I created subscription box all about stress and well-being. The pack include a set of cards to asses your stress, a log book, a overall summary of what stress can do, a leaflet on how to relax and tips to stay positive. This project taught me about tone of voice and how things need to come across to be able to have the most impact.
